PROFESSIONAL SUMMARY

Product professional working across growth, analytics and AI automation, who builds the systems she runs. At FlixStock, leads the Zalando 3D shoe digitization project, managing the client and a technology partner, and scaled throughput 2.5x with self-built automation and dashboards. At GroMo, a fintech platform, ran A/B experiments that lifted activation from 6% to 19%, diagnosed funnel drop-off with SQL, and shipped production AI voice agents and LLM workflows.

WORK EXPERIENCE

Project Coordinator, AI & 3D Imaging | FlixStock | Jul 2026 – Present

AI-powered fashion imagery and content production platform

- Lead the 3D shoe digitization project for **Zalando**, owning delivery end to end from inbound through triage, scanning, delivery and outbound.
- Scaled scanning throughput **2.5x, from ~50 to ~125 shoes per day**, by automating triage of incoming shoes into scannable and non-scannable (**Google Apps Script and Sheets**, built with Cursor and Claude) and streamlining routing and handoffs.
- Built a live operations dashboard for **DeepAR**, the scanner technology partner, tracking inbound, triage split, scans, deliveries and outbound with day-level visibility into output.
- Act as primary point of contact for both Zalando (client) and DeepAR (partner), managing reshoots and rejections, aligning priorities and resolving blockers across studio, scanning and delivery teams.

AI Automation and Product Intern | GroMo | Jul 2025 – Jun 2026

Series-B fintech distributing credit cards, loans and other financial products

- Ran A/B experiments on the voice-agent activation funnel against a no-call control group, lifting activation from **6% to 19%**, and benchmarked multiple voice providers to select the best-performing setup.
- Diagnosed funnel drop-off using **SQL and event logs**, traced it to poorly timed pre-call notifications, and reworked notification timing and targeting to improve pick-up and engagement.
- Wrote the PRD for an in-app welcome-call agent guiding new users through creating and converting their first lead, defining the onboarding flow, user stories and success criteria.
- Built and deployed real-time AI voice agents and IVR call agents for inbound and outbound calls, designing conversational flows, intent handling and live data fetch mid-call.
- Engineered an LLM-based query responder (n8n + GPT-4o + Zoho Desk) that classifies intent and pulls live lead and sales data via internal APIs, cutting first-level response turnaround by **45%**.
- Shipped an automated **KYC document-verification** system to 24/7 production (OpenAI Assistant API + Zoho Flow), and built OTIS, an internal tracking tool, cutting manual operational effort by **20%**.

Learning & Teaching Assistant | Research Desk COEET, NIIT University | Nov 2022 – Jul 2023; Aug 2024 – Nov 2024

- Led peer research teams to a 15% improvement in project completion rates and mentored 30+ undergraduates in structured problem-solving.

PROJECTS

Halo, AI Creator Manager | Solo Build | 2026

- Identified an unaddressed problem (creators managing scheduling, brand deals, invoicing and fan relationships with no back office) and built the full AI agent product solo using Claude, Antigravity and Supabase, owning schema, backend and interface.

Cloud-Based Threat Intelligence Dashboard | Capstone | 2025

- Built a real-time monitoring dashboard on GCP (React.js, Node.js) integrating VirusTotal, Shodan and OTX APIs into one pipeline.

EDUCATION

B.Tech in Computer Science | NIIT University | 2022 – 2026

Relevant coursework: Agile and Scrum project management, data structures and algorithms, computer networks, cybersecurity

SKILLS

Product & Analytics: PRDs, user stories, roadmapping, funnel and conversion analysis, A/B testing, KPI tracking, SQL, Excel, Google Sheets, JIRA, Asana, Agile and Scrum
Client & Partner Management: client communication, vendor and partner coordination, escalations, production tracking
AI & Automation: LLM workflows, AI agents, AI voice agents, prompt engineering, RAG, n8n, Zapier, Make, Zoho Flow, Google Apps Script, GPT-4o, Claude and Gemini APIs
Tools & Engineering: Cursor, Claude Code, GitHub Copilot, Python, JavaScript, React.js, Node.js, REST APIs, FastAPI, Supabase, MySQL, GCP, Docker

LEADERSHIP

Marketing Coordinator | Ingenuity '25, NIIT University Annual Fest | 2025

- Led end-to-end marketing for the university's flagship annual event, coordinating cross-functional teams, managing sponsor relationships and running multi-channel campaigns.
